

Project Development Phase Sprint IV

Date	20 November 2022
Team ID	PNT2022TMID38469
Project Name	Project - Signs with smart connectivity for Better road safety

Code for print the random temperature, Road signs, Speed limit, Message :

(RandomValues.py)

```
import wiotp.sdk.device
import time
import random
import ibmiotf.application
import ibmiotf.device
import requests, json

myConfig = {
    #Configuration
    "identity": {
        "orgId": "n6rl9n",
        "typeId": "NodeMCU",
        "deviceId": "621319106312"
    },
    #API Key
    "auth": {
        "token": "9876543210"
    }
}

#Receiving callbacks from IBM IOT platform
def myCommandCallback(cmd):
    print("Message received from IBM IoT Platform: %s" % cmd.data['command'])
    m=cmd.data['command']

client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()
```

```

#OpenWeatherMap Credentials

OpenWeatherMap - (Ex., Salem, IN) :

The screenshot shows the OpenWeatherMap website interface. At the top, there is a navigation bar with the OpenWeather logo and various links like 'Weather in your city', 'Guide', 'API', 'Dashboard', 'Marketplace', 'Pricing', 'Maps', 'Our Initiatives', 'Partners', 'Blog', 'For Business', 'Kuma...', and 'Support'. Below the navigation bar, the main heading 'Weather in your city' is displayed. A search bar contains the text 'Salem, IN' and a 'Search' button. Below the search bar, the weather data for Salem, IN is shown, including a weather icon, the temperature '26.9°C', and a description 'overcast clouds'. The temperature is also shown in a range 'temperature from 26.9 to 26.9 °C'. Other details include 'wind 3 m/s', 'clouds 94 %', and '1009 hpa'. The geo-coordinates are listed as '[11.65, 78.1667]'. Below the weather data, there is a section titled 'Search engine is very flexible. How it works:' followed by a list of instructions on how to use the search engine to get more precise results.

Weather in your city

Salem, IN

Salem, IN  overcast clouds

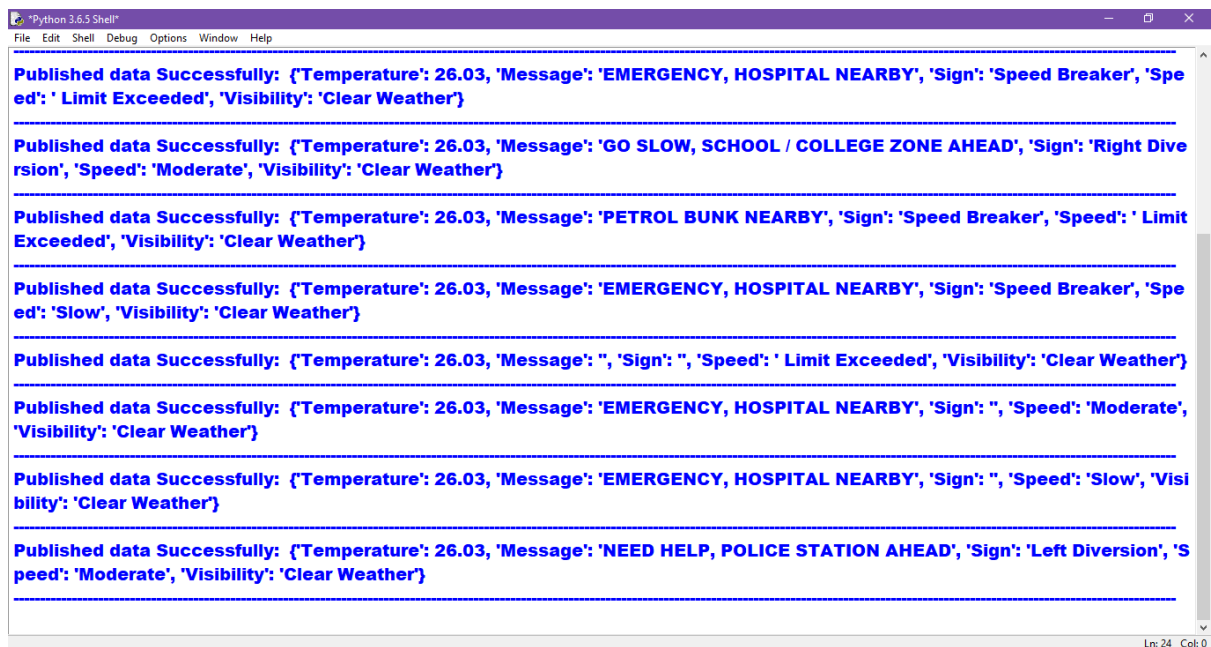

26.9°C temperature from 26.9 to 26.9 °C, wind 3 m/s, clouds 94 %, 1009 hpa

Geo coords [11.65, 78.1667]

Search engine is very flexible. How it works:

- To make it more precise put the city's name, comma, 2-letter country code (ISO3166). You will get all proper cities in chosen country. The order is important - the first is city name then comma then country. Example - London, GB or New York, US.

Python IDLE Output :

The screenshot shows the Python IDLE output window. It displays a series of messages indicating successful data publications. Each message is a JSON object containing 'Temperature', 'Message', 'Sign', 'Speed', and 'Visibility' fields. The messages are separated by horizontal lines. The output is as follows:

```
Published data Successfully: {'Temperature': 26.03, 'Message': 'EMERGENCY, HOSPITAL NEARBY', 'Sign': 'Speed Breaker', 'Speed': 'Limit Exceeded', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': 'GO SLOW, SCHOOL / COLLEGE ZONE AHEAD', 'Sign': 'Right Diversion', 'Speed': 'Moderate', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': 'PETROL BUNK NEARBY', 'Sign': 'Speed Breaker', 'Speed': 'Limit Exceeded', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': 'EMERGENCY, HOSPITAL NEARBY', 'Sign': 'Speed Breaker', 'Speed': 'Slow', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': '', 'Sign': '', 'Speed': 'Limit Exceeded', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': 'EMERGENCY, HOSPITAL NEARBY', 'Sign': '', 'Speed': 'Moderate', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': 'EMERGENCY, HOSPITAL NEARBY', 'Sign': '', 'Speed': 'Slow', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': 'NEED HELP, POLICE STATION AHEAD', 'Sign': 'Left Diversion', 'Speed': 'Moderate', 'Visibility': 'Clear Weather'}
```
